

Step 1
Media pouches & sterile bottle

Step 2
Cut open both the pouches carefully.

Step 3
Pour the contents of both pouches into the bottle

Step 4
Water upto the red arrow mark.

Step 5
Keep in a warm place for 18 to 24 hours.

if color does not changes,water is potable

Step 6
Then observe the colour of liquid in bottle.

When color chages to yellow the water is not Potable
