Coal Fuel Additive

SKU: AGN6100(25) | Range: 25 Kg in Bag

Coal is one of the primary sources of energy accounting for about 67% of the total energy consumption in the country. India has some of the largest reserves of coal in the world. Indian coal has high ash content and low calorific value. Our AGN6100 - COAL FUEL ADDITIVE is a free-flowing powder treatment designed primarily as combustion catalyst for Coal which helps to reduce loss due to unburnt fuel resulting in improved combustion efficiency. It has an anti fouling agent that helps to keep heat transfer surfaces clean and thus improves the steam generation for same heat transfer area. It also softens the hard clinker and reducing the tendency of hard clinker formation thus helps in reducing the boiler maintenance provide ease in cleaning and increase the boiler availability for long term operation. It promotes smoke free combustion at lower excess air levels resulting in improved fuel economy.

KEY PRODUCT FEATURES

- Reduces smoking
- Decrease unburned carbon
- Improves fuel economy
- Improves combustion
- Reduces soot
- Prevents Corrosion

TECHNICAL SPECIFICATIONS

Form: Powder
Packing: 500GM X 50 NOS (25KG BAG)
HSN: 38249022
Refer to Product Literature for Complete Specification
