Food Grade Chiller Plant Cleaner Chemical

SKU: WT1153A(35) | Range: 35 Kg Pack - Chiller Plant Cleaner Part A

Our Closed System cleaning system has been specially developed to effectively remove deposit sludge / foulants from the system. It is a blend of specific chelating agents designed for removal of Iron Calcium and Magnesium based deposits from cooling water systems where it is not practical to remove the tower packing. It is found to be most effective in cleaning where deposition or oil contamination is suspected of reducing heat transfer or restricting flow available. Deposits are softened and solubilized as our cleaner penetrates the deposits and enhances the action of cooling water dispersants to slough off remaining deposits which are later removed during a blow down or draining. WT1153A - Closed System Chemical De-Scalant and WT1153B - Closed System Polymeric Dispersant to be used in Combination for treament.

KEY PRODUCT FEATURES

- Food Grade Cooling Water Treatment
- NSF Certified for Food Processing Cooling Treatment
- Environment-friendly and Non-Toxic Cooling Treatment
- Economical and Ready to use in 35/50 KG Pack
- High Tolorence and Chemical Stability
- Easy to handle with Rapid Action for Instant solution
- Complete Cooling Tower Protection to Enhance system life

TECHNICAL SPECIFICATIONS

Form: Liquid
Packing: 35KG / 50KG HEDP Polycan
HSN: 38249022
Refer to Product Literature for Complete Product Specification
