

Boiler Water Oxygen Scavenger

SKU: WT3030(35) | Range: 35 Kg Pack - Hydrazine Based

Metallic corrosion due to oxygen is a major concern in the operation and maintenance of industrial boiler systems and steam plants. Oxygen derived from boiler water will corrode metallic components leading to increased maintenance costs and reduced boiler efficiency. To ensure that such boiler systems are well maintained and operate at optimum efficiency our specially formulated Sulphite Based oxygen scavenger helps in rapid and complete removal of dissolved oxygen from feed water and boiler water. It is an instant oxygen scavenger and normal reaction time with oxygen is only 15 to 20 second at ambient temperatures.

KEY PRODUCT FEATURES

- Boiler Water Treatment
- Economical and Ready to use
- High Temperatures and High-Pressure Stability
- Easy to handle with Rapid action
- Complete Boiler Protection

TECHNICAL SPECIFICATIONS

Form: Liquid

Packing: 35KG / 50KG HEDP Polycan

HSN: 38249022

Refer to Product Literature for Complete Product Specification
