

Calcium Hardness Test Kit

SKU: AE212 | Range: 25 - 500 PPM (Mg/L)

Calcium hardness is caused by the presence of calcium ions in the water. Calcium salts can be readily precipitated from water and high levels of calcium hardness tend to promote scale formation in the water system. Calcium hardness is an important control test in industrial water systems such as boilers and steam raising plants. Our AQUASOL AE212 - CALCIUM HARDNESS TEST KIT tests high levels of calcium in water.

KEY PRODUCT FEATURES

- Onsite Field Test Kit
- Easy To Follow Procedures
- Based on International Standards (APHA/AWWA/IS)
- Rapid and Accurate and Reliable results
- Available in portable carry case
- Tested and Validated by leading Laboratory
- Economical and long shelf life.

TECHNICAL SPECIFICATIONS

Product Code: AE212

Range: 25 - 500 PPM (MG/L)

No of Tests: 300

HSN: 90275090

Packing: Plastic Case
