Sulphite Test Kit

SKU: AE216 | Range: 5 - 100 PPM (Mg/L)

Sulphite is not usually present in surface waters. If sulphite is discharged in effluents or from domestic wastewaters it readily oxidizes to sulphate. Sodium sulphite the most common form of sulphite is an excellent reducing agent and is commonly used as an oxygen scavenger to control corrosion. Sulphite concentrations in boiler and process waters must be monitored regularly to protect the systems. Our AE216 - SULPHITE TEST KIT works when sulphite in salt form has been added to waters. It is a titration method easy to use and easy to read.

KEY PRODUCT FEATURES

- Onsite Field Test Kit
- Easy To Follow Procedures
- Based on International Standards (APHA/AWWA/IS)
- Rapid and Accurate and Reliable results
- Available in portable carry case
- Tested and Validated by leading Laboratory
- Economical and long shelf life.

TECHNICAL SPECIFICATIONS

Product Code: AE216
Range: 5 - 100 PPM (MG/L)
No of Tests: 300
HSN: 90275090
Packing: Plastic Case
