Nitrite Test Kit

SKU: AE237 | Range: 100 - 2000 PPM (Mg/L)

Nitrites occur in water as an intermediate product in the biological breakdown of organic nitrogen being produced either through the oxidation of ammonia or the reduction of nitrate. The presence of large quantities of nitrites is indicative of wastewater pollution. Low-range nitrite estimation is useful for drinking water analysis. Nitrite is added to control corrosion in closed cooling systems. Our AQUASOL AE207 - NITRITE TEST KIT kits are based on colour comparison and are very simple and convenient to use.

KEY PRODUCT FEATURES

- Onsite Field Test Kit
- Easy To Follow Procedures
- Based on International Standards (APHA/AWWA/IS)
- Rapid and Accurate and Reliable results
- Available in portable carry case
- Tested and Validated by leading Laboratory
- Economical and long shelf life.

TECHNICAL SPECIFICATIONS

Product Code: AE237
Range: 100 - 2000 PPM (MG/L)
No of Tests: 300
HSN: 90275090
Packing: Plastic Case
