

## Chloroscope Test Kit

SKU: AE419 | Range: 0.05 – 5.0 PPM (Mg/L) - 500 Tests

Chlorine is the most widely used oxidizing biocide today for the disinfection of domestic water supplies as also for the removal of tastes and odors from water. The amount of chlorine required to be added to a water system is determined by chlorine demand contact time pH and temperature of the water. Chlorine residual in drinking water indicates that disinfection has been achieved by chlorine and bacteria/viruses that cause diarrheal disease have been eliminated. Also, the water is protected from recontamination during storage. Our AQUASOL single reagent-based AE409 - CHLORINE TEST KIT (CHLOROSCOPE) comes with a scientifically designed Colour Comparator. The economical Comparator based design not only discerns colours easily but also helps to achieve results quickly. This AE419 - CHLORINE TEST KIT (CHLOROSCOPE) is a cost-effective and convenient method for periodic monitoring of free chlorine in water. The endpoint is very sharp and easily discernable by the user. Even a shop floor worker will be able to get the desired results with our test kit.

### KEY PRODUCT FEATURES

- Onsite Field Test Kit
- Easy To Follow Procedures
- Based on International Standards (APHA/AWWA/IS)
- Rapid and Accurate and Reliable results
- Available in portable carry case
- Tested and Validated by leading Laboratory
- Economical and long shelf life.

### TECHNICAL SPECIFICATIONS

Product Code: AE419

Range: 0.05 – 5.0 PPM (MG/L)

No of Tests: 500

HSN: 90275090

Packing: Plastic Case
