PH Test Kit

SKU: AE326 | Range: PH 7.4 - 9.0

pH is the measure of the hydrogen ion concentration in water. It denotes if the water is acidic or alkaline . When pH is 7 it is said to be neutral. Natural water range between pH 5.0 and pH 10.0 while sea water is near pH 8.3. pH is an essential factor which affects the growth of any living species. Hence it is always advisable to monitor pH regularly to ensure the well-being of all living species. Most marine animals are different from fresh water species in the sense that they require a smaller pH range to thrive viz. 7.5 8.5. This is due to the fact that at lower pH marine species are not able to maintain the salt balance and not only does the animal cease to reproduce but also die. Our AQUASOL AE326 - PH TEST KIT comprises of a universal indicator giving clear colours which match the colour chart perfectly. An extremely easy to use product it finds usage in almost all processes.

KEY PRODUCT FEATURES

- Onsite Field Test Kit
- Easy To Follow Procedures
- Based on International Standards (APHA/AWWA/IS)
- Rapid and Accurate and Reliable results
- Available in portable carry case
- Tested and Validated by leading Laboratory
- Economical and long shelf life.

TECHNICAL SPECIFICATIONS

Product Code: AE326
Range: PH 7.4 - 9.0
No of Tests: 500
HSN: 90275090
Packing: Plastic Case
