Ammonia Test Kit

SKU: AE357 | Range: 0.05 - 8.0 PPM (Mg/L)

Ammonia is present in variable concentrations in many surface and groundwater supplies. It is rapidly oxidized by certain bacteria in natural water systems to nitrite and nitrate a process that requires the presence of dissolved oxygen. Ammonia being a source of nitrogen is also a nutrient for algae and other forms of plant life and thus contributes to overloading of natural systems and cause pollution. Ammonia is important to be tested in fisheries. Our AE357 - AMMONIA TEST KIT is based on color comparison and results obtained are easily discernable.

KEY PRODUCT FEATURES

- Onsite Field Test Kit
- Easy To Follow Procedures
- Based on International Standards (APHA/AWWA/IS)
- Rapid and Accurate and Reliable results
- Available in portable carry case
- Tested and Validated by leading Laboratory
- Economical and long shelf life.

TECHNICAL SPECIFICATIONS

Product Code: AE357
Range: 0.05 - 8.0 PPM (MG/L)
No of Tests: 250
HSN: 90275090
Packing: Plastic Case
