

Arsenic Test Kit

SKU: AE408 | Range: 0 - 100 PPB & 0 - 3.0 PPM (Mg/L)

Arsenic in drinking-water is a hazard to human health. The main source of arsenic in drinking-water is arsenic-rich rocks through which the water has filtered. It may also occur because of mining or industrial activity in some areas. AQUASOL AE408 arsenic test kit provides easy-to-use low-cost method for measuring arsenic levels in water. This water test kit is quite novel and one of its kind. It is the effort of our in-house Research and development.

KEY PRODUCT FEATURES

- Onsite Field Test Kit
- Easy To Follow Procedures
- Based on International Standards (APHA/AWWA/IS)
- Rapid and Accurate and Reliable results
- Available in portable carry case
- Tested and Validated by leading Laboratory
- Economical and long shelf life.
