

Chloroscope Test Kit

SKU: AE409 | Range: 0.05 – 5.0 PPM (Mg/L) - 1000 Tests

Chlorine is the most widely used oxidizing biocide today for disinfection of domestic water supplies as also for the removal of tastes and odours from water. The amount of chlorine required to be added in a water system is determined by chlorine demand contact time pH and temperature of the water. Chlorine residual in drinking water indicates that disinfection has been achieved by chlorine and bacteria / viruses that cause diarrheal disease have been eliminated. Also the water is protected from recontamination during storage. Our AQUASOL single reagent based AE409 - CHLORINE TEST KIT (CHLOROSCOPE) comes with a scientifically designed Colour Comparator. The economical Comparator based design not only discern colours easily but also helps to achieve results quickly. This AE409 - CHLORINE TEST KIT (CHLOROSCOPE) is a cost effective and convenient method for periodic monitoring free chlorine in water.. The end point is very sharp and easily discernable by the user. Even a shop floor worker will be able to get desired results with our test kit.

KEY PRODUCT FEATURES

- Onsite Field Test Kit
- Easy To Follow Procedures
- Based on International Standards (APHA/AWWA/IS)
- Rapid and Accurate and Reliable results
- Available in portable carry case
- Tested and Validated by leading Laboratory
- Economical and long shelf life.

TECHNICAL SPECIFICATIONS

Product Code: AE409

Range: 0.05 – 5.0 PPM (MG/L)

No of Tests: 1000

HSN: 90275090

Packing: Plastic Case
