

Aluminium Test Kit

SKU: AE451 | Range: 0.0 - 1.5 PPM (Mg/L)

Aluminum can enter a water from natural deposits or because of discharges from industrial operations. Its contamination in water is a known neurotoxin with possible links to dementia and Alzheimer's disease. Aluminum also builds up on water pipes and water meters and service lines and resulting in malfunctions and can lead to breakdowns. Also it is used in some water systems to reduce microorganisms and but it is supposed to be removed from the water before it goes to consumers. Our AE451 - ALUMINIUM TEST KIT is based on color comparison and results obtained are easily discernable.

KEY PRODUCT FEATURES

- Onsite Field Test Kit
- Easy To Follow Procedures
- Based on International Standards (APHA/AWWA/IS)
- Rapid and Accurate and Reliable results
- Available in portable carry case
- Tested and Validated by leading Laboratory
- Economical and long shelf life.

TECHNICAL SPECIFICATIONS

Product Code: AE451

Range: 0.0 - 1.5 PPM (MG/L)

No of Tests: 100

HSN: 90275090

Packing: Plastic Case
